Phase: Stage 2 level 2
Nb Title: Mid- size Satellite industrialisation (competitiveness and sovereignty)aim at increasing production volume, reducing cost , and Lead time

TRL MRL Budget
Start Target Start Target
Months TBD (12) month
Programme

1 Consolidation – Feasibility 4+ 4
2 Finalise Product 6 / 7 12
3 Industrialisation 7 10
M-IND proposals – in response to Request for Info (RFI):
• using the standard GSTP Building Block outline template
• and the M-IND Checklist
Build for procurement
Initial recommendation in the M-IND RFI

GSTP
EOI_ Identified fit : The Proposal must use GSTP Building Block Template and must identify the [REQ-1 to REQ-46] in the Checklist of the M-IND guidelines,
which must facilitate completeness and compliance analysis.
The proposal requires information on product overview,
application, technical overview, and subsystem relevance. While there is
some information on potential users and market drivers, the overall fit for
mid-size LEO satellites, and under which type of equipment/module
category must be addressed.
